GENERATOR

Vol. 1, No. 6, June 2017

WELCOME BACK *Dian*

Dian had a wonderful time abroad and returned with expert knowledge pertaining to advanced synchronization and remote monitoring. Keep an eye on the **PacB** team as they plan to knock your technological socks off in the near future.

ATTENTION
Read Me

FAW/SIDA will only carry a standard warranty on PARTS. Should a callout be required a callout fee will be charged. These callout fees will be calculated based on:

1. Callout hours accumulated
2. AA tariffs per kilometre travelled

These callout fees will be invoiced prior to the callout. We urge you to focus on selling PERKINS on the smaller sizes due to superior quality. We advise you to convince clients to purchase Perkins because in the long term a FAW/SIDA will be far more of an expense than originally planned.

Please be advised that should you be quoting for the Ethekeeni (Durban) area it is compulsory to use 4 Pole as opposed to 3 Pole. The pricelist now provides the 4 Pole option.

Do you need a backup generator?

"Who you gonna call?"

Don't get stuck in the dark this Winter?
